QUICK FLEX Modular

Adaptable to any shape with extreme aggressiveness.

- Wood sanding with both concave and convex profiles
- Rods, beads, skirting boards, shaped profiles in general
- Sanding of hard funds such as polyurethane and polyester
- Polishing of wax, oil and metal

The A-flex abrasive fibre elements are made with a straight brush of Tampico on which is applied a sheet of abrasive canvas with grain of jagged choice self-adhesive.

BRUSH CHARACTERISTICS

Quick Flex modular is a sanding tool born with the concept of modularity. Indeed, if you pair a certain number of modular supports, you can get a cylinder of any length. The A-flex abrasive fibre elements are made with a straight brush of Tampico on which is applied a sheet of abrasive canvas with grain of jagged choice self-adhesive. This abrasive fibre elements are easily positioned on the Quick Flex brush holder cylinder by sliding them into the "V" quarries. Thanks to these features, the Quick Flex brush is totally regenerable, both for abrasive and Tampico.
