

HW INSERT FLUSH TRIMMING BITS WITH BALL BEARING Z2

WC122

Sistemi has developed a new line of **Klein router bits with interchangeable carbide knives**, with an higher hardness and easy to be replaced, moreover there are other important advantages:

- **Longer tool life**, with knives easy to be replaced,
- **Better finish quality** thanks to the cutting edge always sharpened,
- **Higher measures precision** because the dimensions of cutting edge don't change,
- **Better quality/price ratio** with an higher production efficiency.
- **Complete with reversible knives.**
- The same knives can be used for both 45° and R= 3 bevel.
